HILL AFB RECEIVES FIRST TWO F-35A LIGHTNING IIs

Hill AFB, Utah, Sept. 2, 2015 – The first two Lockheed Martin [NYSE: LMT] F-35A Lightning IIs assigned to the 388th Fighter Wing were officially delivered to the base today. The two F-35A Conventional Takeoff and Landing variants, known as AF-77 and AF-78, are the first of 72 F-35As scheduled for delivery to the base.

“The F-35A Lightning II represents the future of tactical aviation for the United States and our allies,” said Col. David Lyons, 388th FW Commander. “Alongside our 419th Fighter Wing counterparts, we’re excited to usher in a new era of combat capability for the Air Force.”

Today’s delivery marks the stand-up of the 10th F-35 base and Hill is the fifth Air Force base to receive the lightning II. During the next several months, Hill will receive additional F-35As, pilots and maintenance personnel in order to meet requirements for the declaration of IOC in 2016.

“The F-35A Lightning II provides the USAF and international partners a decisive edge over its adversaries,” said Lorraine Martin, Lockheed Martin F-35 Program General Manager. “The exceptional capabilities of this 5th generation stealth fighter are now in the hands of the Hill team and we couldn’t be prouder of our warfighters at the 388th and 419th Fighter Wings.”

The F-35A Lightning II is a 5th generation fighter, combining advanced stealth with fighter speed and agility, fully fused sensor information, network-enabled operations and advanced sustainment. Three distinct variants of the F-35 will replace the A-10 and F-16 for the U.S. Air Force, the F/A-18 for the U.S. Navy, the F/A-18 and AV-8B Harrier for the U.S. Marine Corps, and a variety of fighters for at least nine other countries.

Headquartered in Bethesda, Maryland, Lockheed Martin is a global security and aerospace company that employs approximately 112,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. The Corporation’s net sales for 2014 were \$45.6 billion.
